FIRST ENCYCLOPEDIA SERIES (HB)

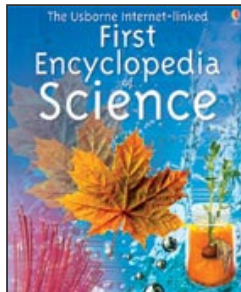

0746078390, DINOSAURS, S TAPLIN, \$13.30

What was the biggest dinosaur? When was the ice age? Why did the dinosaurs die out? Find out in this lavish and lively book. Simple text, beautiful illustrations, stunning photographs of dinosaur models and links to exciting recommended websites introduce young readers to the wonder of the prehistoric world.

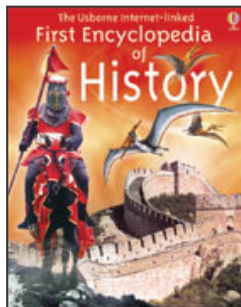

0746078404, ANIMALS, PAUL DOWSWELL, \$13.30

Young readers will learn about familiar animals, as well as discovering some fascinating new ones. Extraordinary wildlife photography and illustrations bring the reader face-to-face with the marvels of the animal world. Simple text explains how animals behave, including how they feed, communicate and raise their young. Mammals, birds, reptiles and water-life are all covered in separate sections for easy reference in this invaluable information book.

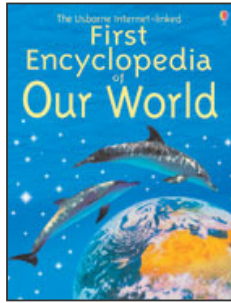

0746078412, SCIENCE, RACHEL FIRTH, \$13.30

Why do things float? What happens to the food you eat? Find out the answers to these and many more questions in this lively book that introduces young readers to the wonders of science. With simple text, amazing photographs and illustrations, fun science activities and exciting recommended Web sites.

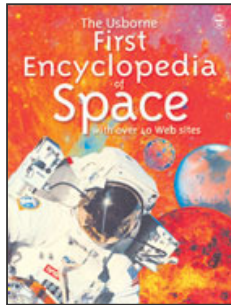

0746078420, HISTORY, F CHANDLER, \$13.30

Who lived in the Forbidden City? When was the World Wide Web invented and who were the Aztecs? Find out in this bright and lively introduction to history. Simple text, stunning photographs, detailed illustrations and links to exciting recommended Web sites bring the past alive for young historians.

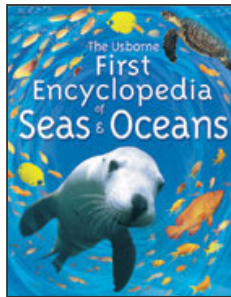

0746078439, OUR WORLD, F BROOKS, \$13.30

A fascinating starting point for children with questions about our planet. Detailed illustrations, photographs and simple, easy-to-read text will encourage children of all ages to find out more while discovering the basic concepts of geography. Usborne-recommended Web sites expand the book's content.

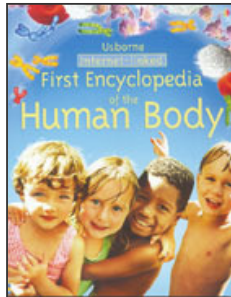

0746078447, SPACE, P DOWSWELL, \$13.30

An exciting visual adventure into the fascinating world of space, with satellite photographs and detailed illustrations. Simple everyday language reveals the latest information about the universe. Over 40 Usborne-recommended Web sites expand the book's content with fun and informative sites to visit.

0746078455, SEAS & OCEANS, B DENNE, \$13.30

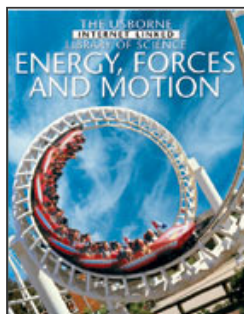

Young readers are introduced to the wonders of the sea in this vividly illustrated information book. Easy-to-read text, superb photographs and exciting Usborne-recommended Web sites provide a stimulating learning experience. Every major sea subject is covered, from coral reefs, whales and dolphins to undersea exploration and environmental threats.

0746078463, HUMAN BODY, F CHANDLER, \$13.30

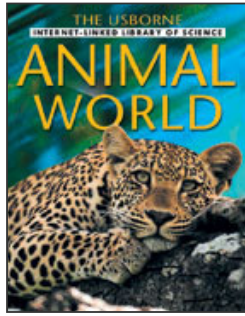

Simple text, stunning photographs, detailed illustrations, fun activities and links to exciting recommended websites introduce young readers to the wonder of the human body. Easy to read and beautifully designed with sections on all the parts of the body plus health, diet and seeing a doctor, this is an ideal first reference book.

LIBRARY OF SCIENCE SERIES (HB)

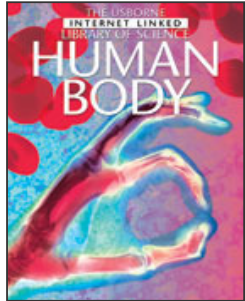

0746078471, ENERGY FORCES MOTION, A SMITH, \$13.30

Stunning photographs and detailed diagrams help demonstrate the use of physics in everyday life. Discover how cars work, why things fall down instead of up, and much more. An ideal revision tool, this book also contains experiments, activities and recommended Web sites designed to enhance learning.

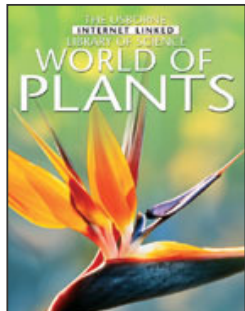

074607848X, ANIMAL WORLD, L HOWELL, \$13.30

Discover the latest information about the animal kingdom and meet some weird and wonderful new creatures in this fascinating introduction. An ideal revision tool, this book covers key concepts in animal biology and contains activities and recommended Web sites designed to enhance learning.

0746078498, HUMAN BODY, K ROGERS, \$13.30

Readers will embark on an incredible adventure into the workings of the human body in this superbly illustrated book. An ideal revision tool, it also contains activities and Usborne-recommended Web sites designed to enhance learning. Includes a comprehensive index and glossary of useful terms.

0746078501, WORLD OF PLANTS, L HOWELL, \$13.30

Find out why plants are vital to our survival in this fascinating book. Richly illustrated and informative, it reveals the unseen world of plants and fungi. An ideal revision tool, this book also contains experiments, activities and recommended Web sites designed to enhance learning.

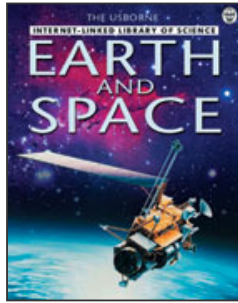

074607851X, LIGHT SOUND & ELECTRICITY, K ROGERS, \$13.30

Remarkable photographs and the latest information about today's technological world can be found in this excellent book. An ideal revision tool, it also contains activities and Usborne-recommended Web sites designed to enhance learning. Includes a comprehensive index and glossary of useful terms.

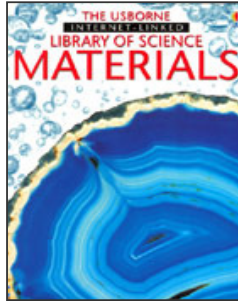

0746078528, MIXTURE & COMPOUNDS, K ROGERS, \$13.30

Discover the amazing science behind everyday materials such as plastics and paint in this densely illustrated book. An ideal revision tool, it also contains activities and Usborne-recommended Web sites designed to enhance learning. Includes a comprehensive index and glossary of useful terms.

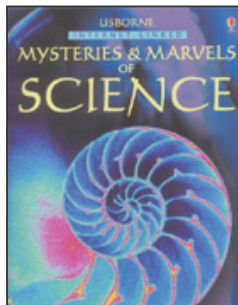

0746078536, EARTH & SPACE, K ROGERS, \$13.30

Discover the latest information about Planet Earth and the Solar System in this superbly illustrated title. An ideal revision tool, this book also contains activities and Usborne-recommended Web sites designed to enhance learning. Includes a comprehensive index and glossary of useful terms.

0746078544, MATERIALS, A SMITH, \$13.30

Taking examples from everyday life, this fascinating book explores the chemistry of solids, liquids and gases, explaining exactly what they are and how they behave. An ideal revision tool, this book also contains experiments, activities and recommended Web sites designed to enhance learning.

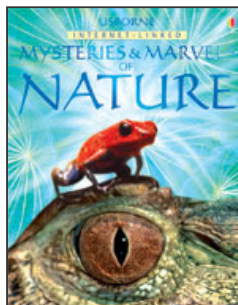

0746078552, MYSTERIES AND MARVELS OF SCIENCE, PHILLIP CLARKE, \$19.00

Breathtaking photographs and informative digital illustrations reveal the surprising science behind events in the everyday world.

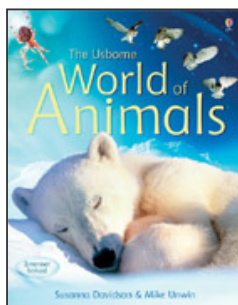

From the deep mysteries of the atom to the futuristic marvels of technology, enthusiastic young readers will learn about the breadth of the subject.

Recommended websites, via the Usborne Quicklinks website, help readers to delve deeper into the secrets of science.

0746078560, MYSTERIES AND MARVELS OF NATURE, \$19.00

It is hard to believe some of the extraordinary, and sometimes gory, images in this fascinating examination of the wonders of the world. From squeezing to poisoning, from camouflage to crushing, this book will stimulate an interest in the natural world.

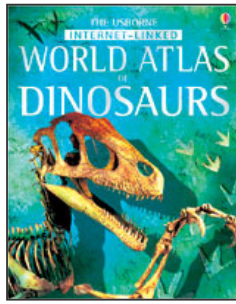

0746078579, WORLD OF ANIMALS, \$19.00

Extraordinary photographs and simple yet informative text will enthral young children.

Includes: Animal behaviour and life-cycles; how animals eat, move and communicate; a continent-by-continent introduction to animal kingdoms, from the canopy communities of the Central American rainforests to the deep-sea monsters of the oceans

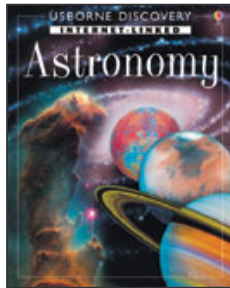

Superb present for any young animal enthusiasts.

0746078587, WORLD ATLAS OF DINOSAURS, \$19.00

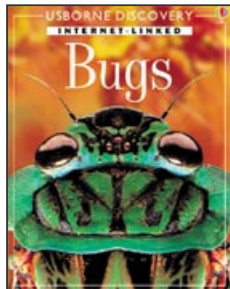

This superb new atlas takes a fresh and exciting look at the amazing world of dinosaurs. With detailed maps and superb illustrations, it shows which dinosaurs lived in different parts of the world. Readers can explore the world's biggest and best fossil sites, find out about famous dinosaur hunters and visit Jurassic graveyards.

DISCOVERY SERIES (HB)

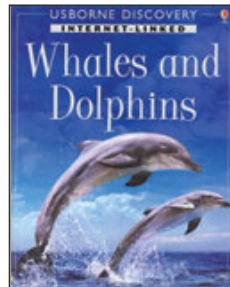

0746078633, ASTRONOMY, R FIRTH, \$9.50

On a clear night, thousands of stars can be seen in the sky - but they are just a tiny part of what's out in space. This book shows young readers how to discover some of the amazing things that are out there, many of which can be seen with just a pair of binoculars or a small telescope.

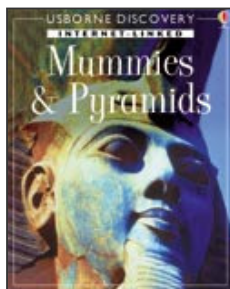

0746078641, BUGS, R DICKENS, \$9.50

Did you know that for every person alive there are several million insects? Scientists know of over a million different species. Discover more about the incredible world of creepy-crawlies: their camouflage, life-cycles, habitats and communities in this fascinating Internet-linked book.

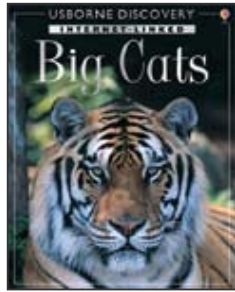

074607865X, WHALES & DOLPHINS, S DAVIDSON, \$9.50

Did you know whales never sleep or that an elephant could fit on a blue whale's tongue? Discover the amazing underwater world of whales and dolphins, where they live, what they eat and how they 'talk' in this fascinating Internet-linked book. Vibrant photography and colourful illustrations, lively text and surprising facts make this book hard to put down.

0746078668, MUMMIES & PYRAMIDS, S TAPLIN, \$9.50

Discover the amazing secrets of ancient Egyptian pyramids - why they were built, how and who by - and the history of mummies from Egypt, South America and China. This fascinating Internet-linked book with remarkable photographs and facts explores the latest scientific techniques used to unlock the secrets of the past and the public interest that has surrounded this subject for hundreds of years.

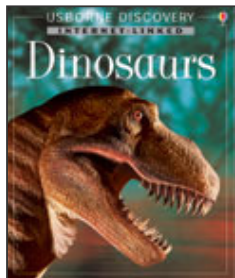

0746078676, BIG CATS, J SHEIKH-MILLER, \$9.50

All the big cats from the cute and cuddly to the man-eaters covered in superb detail with amazing action photographs and specially commissioned illustrations. With links to big cat Web sites covering live action sequences and big cat roars!

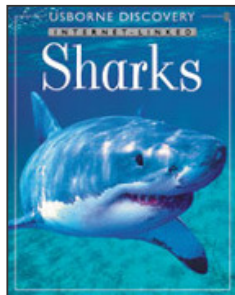

0746078684, BIRDS, G DOHERTY, \$9.50

Packed with information about birds from around the world, this fascinating book looks at the life of birds and their amazing powers of flight, elaborate courtship displays and incredible nest-building abilities. Extraordinary photography gives close-up views of birds in their natural habitats, while lively illustrations and diagrams provide insight into their habits. Specially chosen Web sites have been included to enrich the book's content and link children to the Internet for incredible views of birds via live video-cams, or to listen to sound clips of birdsong or track the course of migrating birds.

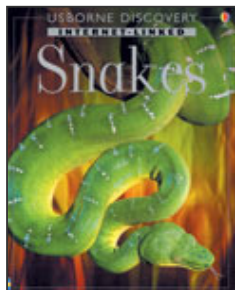

0746078692, DINOSAURS, R FIRTH, \$9.50

Dramatic illustrations and superb photographs of life-size models give young readers a remarkable view of prehistoric times. Includes many species, from the Tyrannosaurus Rex, plant eaters, sea creatures and flying reptiles to the fastest, tallest and strongest dinosaurs discovered so far. Usborne-recommended Web sites suggested throughout.

0746078706, SHARKS, J SHEIKH-MILLER, \$9.50

Sharks fascinate children and this remarkable and sensitively written book looks at sharks of all shapes and sizes, from some no larger than your hand to those bigger than buses. Dramatic underwater photography reveals the world of sharks and readers can find out what drives them into feeding frenzies, how they look when they are about to attack and how they can "feel" fish swimming nearby. Specially chosen Web sites have been included to enrich the book's content and link children to the Internet to join a shark safari, see live pictures of blacktip reef sharks or learn where shark attacks occur and how they happen.

0746078714, SNAKES, J SHEIKH-MILLER, \$9.50

A fascinating close-up of snakes in their natural habitat packed with information about the fastest, biggest, rarest and deadliest snakes in the world. Remarkable photographs and diagrams reveal their surprising habits and help broaden young readers' understanding of these extraordinary creatures. Usborne-recommended Web sites suggested throughout.
